

**PROCESS FOR PREPARING CRYSTALLINE FORM I OF CABERGOLINE**

**Abstract**

The invention is directed in one aspect to a process for producing crystalline form I of cabergoline, which comprises crystallization of the desired form from a toluene/heptane or  
5 toluene/hexane mixture starting from raw cabergoline, followed by recovery and removal of the solvent from the resulting toluene solvate form X. The new solvate form X of cabergoline, useful intermediate, and its preparation are also provided.
